AIXAM IS THE ONLY LICENSE-FREE VEHICLE MANUFACTURER TO OFFER A 100% ELECTRIC RANGE

Equipped with a "zero emission" motor, the e-AIXAM range releases no CO_2 into the atmosphere and is compliant with the Crit'air standard which identifies and classifies the cleanest vehicles.
Discover our e-AIXAM range at aixam.com

0% NOISE EMISSIONS

100% SILENT-RUNNING

3.4 hours FOR A FULL CHARGE FROM A SINGLE 220 V ELECTRICAL SOCKET

LIVE THE EXPERIENCE

e-AIXAM

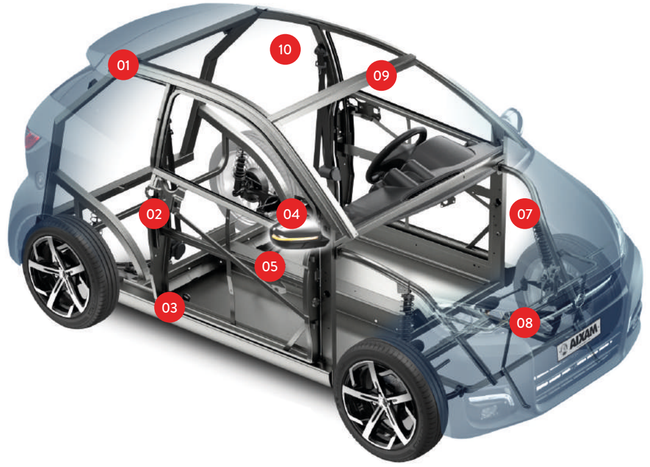
- Approximately 100 km under typical conditions* and 130 km maximum over cycle**
- 0% noise pollution.
- 0% CO_2 released to the atmosphere, 0% nitrogen dioxide, 0% particulates.
- 3.4 hours to full charge from a 220 V domestic mains power socket 1 hour of charge time = 20 km of range
- A cost of approximately €1 per 100 km
- Energy recovery: the battery is recharged when coasting or under braking.
- Lithium traction battery with a 5-year warranty***
- 2 full size seated places, a capacious boot, an enclosed and heated passenger compartment
- Nippy and manoeuvrable at low speeds.

* Average range recorded over typical journey.
Numerous factors may impact this value in a negative manner.
** In accordance with the UE/134/2014*2018/295 regulation
*** Please refer to the warranty conditions.

SAFETY IS OUR PRIORITY

It is integral to the production process, from the technical design phase to the selection of the high-tech parts and materials. AIXAM is also the first license-free vehicle manufacturer to submit their range to crash testing.

AIXAM EXCLUSIVITY
And for maximum safety, AIXAM offers an ABS* option. ABS prevents wheel locking under emergency braking; Control over your trajectory, limited loss of traction regardless of the weather conditions.



01 ROOF RAIL SECTION
Its specific design, adapted to the vehicle, allows the windscreen and roof to be bonded directly to the structure, increasing body rigidity and improving occupant protection.

02 DOOR REINFORCEMENTS
Bars protect vehicle occupants against side impacts.

03 SIDE MEMBERS
The sill panels are reinforced to prevent body shell deformation, thus creating a survival cell to protect the occupants.

04 LARGE DOOR MIRRORS
The large mirrors are curved to limit blind spots. The integral direction indicator repeaters make manoeuvres safe.

05 CENTRAL TUNNEL
Reinforces the chassis and protects the occupants.

06 DIAGONAL BRAKING SYSTEM
This system provides the best stability and safety on the market. The rigid hose braking system requires less force on the brake pedal.

07 "HIGH-TENSILE" STEEL SUBFRAME
The front subframe and its arms are constructed from "High-Tensile" steel to obtain a very high level of strength to protect occupants while reducing weight.

08 COLOUR-INGRAINED BODYWORK
It is thermoformed and damps and absorbs the energy from light impacts.

09 PANORAMIC VISION
The large glazed surfaces offer exceptional visibility while avoiding blind spots.

10 SAFETY BELTS
The safety belts are tested at full load under a traction force of 5.4 tonnes, or twice that required by law (2.7 tonnes). This testing equates to 36 times the average weight of each occupant.

* Depending on model

100% ELECTRIC

AIXAM IS DEVELOPING LICENSE-FREE VEHICLE RANGES THAT ARE 100% "MADE IN FRANCE", OFFERING BOTH INTERNAL COMBUSTION ENGINES AND 100% ELECTRIC SOLUTIONS.

AIXAM

AIXAM is the first manufacturer of License-Free Vehicles to offer an electric range.

- 3.4 hours to full charge
- 100 km range*
- 0 noise pollution
- €1 per 100 km
- 0 emissions

* Average range recorded over typical journey. Numerous factors may impact this value in a negative manner.

OR INTERNAL COMBUSTION ENGINE

Powertrains, aerodynamic efficiency, recycling, etc.
Respect for the environment is a major brand focus. Whether a fuel-efficient internal combustion engine or a 100% electric motor, each powertrain is class-leading in terms of emissions control; the internal combustion engine-powered vehicles generate only 80 g/km CO_2 (3.1 l/100 km). In addition, aerodynamic efficiency also plays a role in this commitment to the environment, which is reaching its pinnacle in the processing of waste as each AIXAM vehicle is almost 100% recyclable.

The least-polluting and most economical powertrain on the market.

- Kubota Euro 5 engine
- 479 cc
- 6 kW
- Fuel consumption 3.1 l/100
- 80 g/km CO_2 emissions

DRIVING PLEASURE

Whether an electric motor or an internal combustion engine, our powertrains develop remarkable torque.

My AIXAM
DRIVING FROM THE AGE OF 14

Driving from the age of 14, it's a possibility!

Driving an AIXAM provides you with mobility, independence and freedom from the age of 14 years, with a provisional license obtained from a driving school.
An amazing way to be independent; driving an AIXAM gives you experience behind the wheel, enabling you to practise and be well-prepared for obtaining your driving licence.

And many additional advantages

We're always connected

Bluetooth connectivity, touch screen tablet compatible with Android Auto or Apple Car Play, etc. thanks to all of this on-board technology in my AIXAM, I am always connected to my friends!

We can crank up the volume

As for the sound, there's just one word: massive! Door-mounted speakers, Aixam Concert 6-speaker package with woofers, tweeters and subwoofers, a Pioneer amplified subwoofer, etc. You would believe you were in a concert hall.

We leave nothing overlooked in terms of safety

I chose the ABS option for my AIXAM. The trajectories are controlled and skidding is limited, whatever the weather conditions. That reassures me!

We like our comfort

Rain, wind, cold, etc. Matters very little to me! Stylish interior, with comfortable seats, electric windows, heating, air conditioning, etc. I am a fan of AIXAM's approach to comfort and so are my friends!

We're free

No more need to ask my parents to come and pick me up in the middle of the night or take me to meet my friends in town! My parents are more chilled, and I'm independent.

AIXAM GIVES US ALL A GOOD REASON TO CHOOSE A LICENSE-FREE VEHICLE!

We save time

Get up at 5am to catch the bus or stay in bed for a while longer?
This is a quick and easy decision...
And with AIXAM, I no longer have to wait around. I can set off whenever I choose.

We're responsible

No provisional license, no AIXAM. Once you have completed the theory element at school, you must undergo 8 hours of practical training in driving school. There aren't even any exams to take...
Hello freedom!

We need space

What with sport, leisure and holidays, I always have plenty to transport! Better than a top box, the boot of my AIXAM is big enough to mean there is no more debate; I can take everything with me!

We are stylish

I chose the colour, trim and options. My AIXAM has a style of its own! It's unique, like me!

And to reassure your parents further...

- Safety is an integral focus from the design phase through to production.
- The parts and materials are sourced from major vehicle manufacturers.
- Better protection than a scooter.
- Travel in safety, regardless of the weather conditions.
- ABS option, AIXAM exclusivity.
- Control over trajectory, limited loss of traction, even in unpleasant weather conditions (rain, snow, black ice, etc.).

100% MADE IN FRANCE

AT AIXAM, INNOVATION IS OUR BYWORD

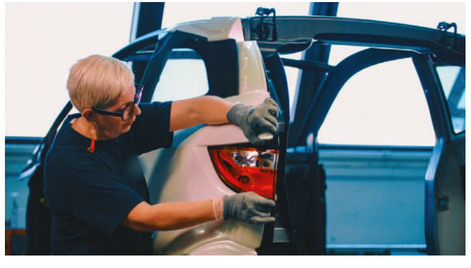
It's synonymous with quality, comfort, simplicity and of course safety.
See for yourself in any of the 12,000 vehicles produced each year at the AIXAM plants in Aix-Les-Bains and Chanas in the Auvergne Rhône-Alpes region.
Vehicles are designed and continually improved to give you control over your mobility.

AIXAM IS PROUD TO DEVELOP AND SHOWCASE ITS INDUSTRIAL KNOW-HOW

Our two production sites are testament to the performance and high technological value you can expect from the AIXAM brand: a perfectly honed and integrated process, from the design phase through to production.
Tooling performance is supplemented by human skills: trained and qualified personnel who design, manufacture, assemble and test all vehicles supplied throughout Europe.

AIXAM IS THE BENCHMARK FOR LICENSE-FREE VEHICLES IN FRANCE AND THROUGHOUT EUROPE, IN ADDITION TO BEING THE UNCONTESTED MARKET LEADER FOR QUADRICYCLES SINCE 1987

FABRIQUÉ EN FRANCE



THE POWER OF A NETWORK

AIXAM has the best national coverage for license-free vehicles thanks to our approved distributor network. We provide you with support on a daily basis, whether at home or on the road, with advice and services; you can always count on our network of over 220 points of sale and after-sales across France.

SERVICES TO PROVIDE YOU WITH PEACE OF MIND

AFTER-SALES AND MAINTENANCE SERVICE

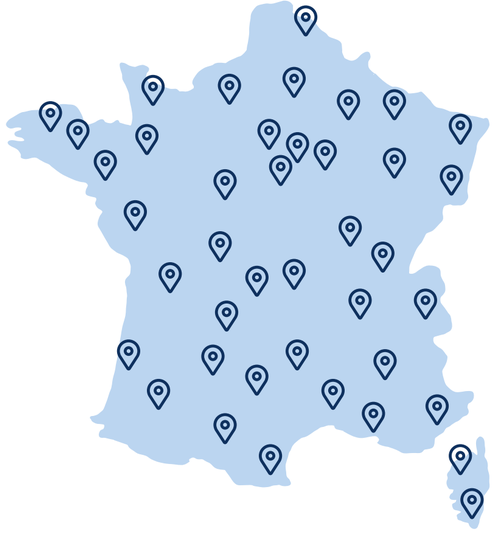
The AIXAM network benefits from an After-Sales department that has been optimised to enable solutions to be provided in the shortest lead times. The manufacturer standardises spare parts and, thanks to a permanent stock, commits to supplying its network in order to guarantee the integrity and long service life of your AIXAM. The AIXAM-approved network has the most recent information from the manufacturer relating to repairs and maintenance: quality, lead times and price are therefore guaranteed.

ASSISTANCE AND WARRANTY

AIXAM provides a 2-year parts and labour warranty for its vehicles and offers you 2 years of breakdown assistance with unlimited mileage.

FINANCE OPTIONS

Thanks to our partners, AIXAM is able to offer solutions suited to your budget. Your distributor will look into the best financing options with you, strictly in line with your requirements and affordability criteria.



Modern, connected, easy to manoeuvre and park thanks to its compact dimensions, City is perfect for daily commutes into town or the outskirts.

With its exclusive and refined exterior design for driving in style at all times, Coupé has a strong character and a completely unique look!

With maximum interior space, a huge boot and the best ground clearance on the market, Cross is the ideal model for those who like to go off the beaten track.
