

AIXAM

MARKET LEADER IN
LICENCE-FREE CARS*

THE LICENCE-FREE CARS RANGE
100 % ELECTRIC

MEETING YOUR REQUIREMENTS

CHANGING NEEDS

AIXAM THE 100 % ELECTRIC LICENCE-FREE CARS

OUR UP-TO-DATE SOLUTIONS ARE BUILT AROUND
THE LATEST MOBILITY REQUIREMENTS.

AIXAM, LEADING THE LICENCE-FREE CAR MARKET SINCE 1987. COMMITTED TO MOBILITY...

For almost 40 years, AIXAM has been by your side to meet the increasing demands of mobility. Key to our success has been our ability to predict trends and offer models both for individuals and companies, perfectly adapted to your daily routine.

ENVIRONMENTALLY FRIENDLY

AIXAM is aware that mobility is inextricably connected to the environment, and as such we design and manufacture zero-emission and low-emission vehicles. We have developed electric models since 2003, well before the vast majority of car manufacturers. We are proud to be the first licence-free cars manufacturer to offer a 100% electric range. This is just one of the many innovations which make our innovative company an influential market leader.

A WIDE RANGE TO SUIT YOU

At AIXAM, we believe that we all have the right to travel, and that it is our duty to provide mobility solutions. As a stakeholder in this sector, we ensure that each model we design is safer, more comfortable and more stylish than the last, while making sure our operations are environmentally friendly.

Both budgets and tastes vary from person to person, so we provide our customers with a wide variety of choice so that each one is able to find the perfect model to suit their usage and lifestyle.

Whether its a compact, coupé, SUV or commercial vehicle, AIXAM is the only company on the market to offer a 100% electric range. With a diverse colour palette and a wide range of finishes and customisation options, our customers have complete freedom.

eAIXAM eTRUCK FOCUS ON THE ELECTRIC RANGE

CHOOSE A MODEL FROM THE AIXAM ELECTRIC RANGE AND
HELP TO PROTECT THE ENVIRONMENT

+ECO-FRIENDLY

The electric engine does not produce any emissions when it is running: no CO₂, particles or nitrogen oxide emissions in the atmosphere. Driving an electric vehicle contributes to improved air quality and gives you the freedom to drive anywhere, even clean air zones in the UK, or during peak pollution times in France.

+COST-EFFECTIVE

- Recharge costs of €1.50 per 100 km and zero energy consumption when the engine is idling.
- Fewer parts and no oil or coolant result in reduced maintenance costs.
- No additional battery rental, so you don't need to plan for extra charges.

+COMFORTABLE

Optimal starting torque, strong acceleration and more power when accelerating again, even at low speeds.

Smooth and dynamic handling, with a silent passenger compartment. What's more, as the electric engine does not create vibrations, the result is a more comfortable experience for both driver and passenger alike.

+SIMPLE

- 3:40 hours for the battery to be fully charged using a 220V domestic socket or using available charging stations*.
- The battery charges when you decelerate or brake.

+BATTERY LIFE

With up to 100 km** battery life under real-life conditions and 130 km in a test cycle***, you can continue your daily journeys with ease, with no need to worry about recharging the battery.

+AGILE

Responsive handling and exemplary manoeuvrability make these vehicles a pleasure to drive.

* Optional adapter.

** Average battery life recorded with a typical journey. Several factors may have a negative impact on this value.

*** In accordance with EU regulations 134/2014 and 2016/1824

**** Depending on the decisions taken by French local authorities

MOBILITY MADE SIMPLE

As it has been awarded the French air quality certificate "Crit'Air 0", the AIXAM electric range gives you access to advantages**** offered to zero-emission vehicles, such as parking benefits or access to restricted zones.

- o Access clear air zones
- o Travel in Low Emission Zones and during peak pollution times in France

ADVANTAGES

BATTERY LIFE. 100 KM IN REAL-LIFE CONDITIONS**

Battery life in the electric mode depends on several factors

- Your driving style
- Climate conditions
- Equipment

3 RECHARGING MODES

AT HOME OR AT WORK
Using a basic 220 V domestic socket

IN THE CITY
Using available charging stations*

WHILE DRIVING
Energy is recovered when decelerating or braking

eCITY SPORT

THE ONLY 100% ELECTRIC COMPACT COMMERCIAL LICENCE-FREE

The 100% electric e-TRUCK range has been designed to support your business, no matter what sector you are working in. The e-TRUCK draws on the expertise of the market leader in compact commercial licence-free cars to offer you unparalleled ease of use: more comfort, less maintenance, more savings... and more protection for the environment.

The e-TRUCK stands out from the crowd thanks to its spacious, comfortable and ergonomic cab, with a significant effective load capacity. Both sufficiently compact to effectively manoeuvre through narrow streets, while also offering a load capacity able to easily transport a 800 mm x 1200 mm palette, the e-TRUCK can adapt to all your needs.

It is available in two configurations: van or stake bed.

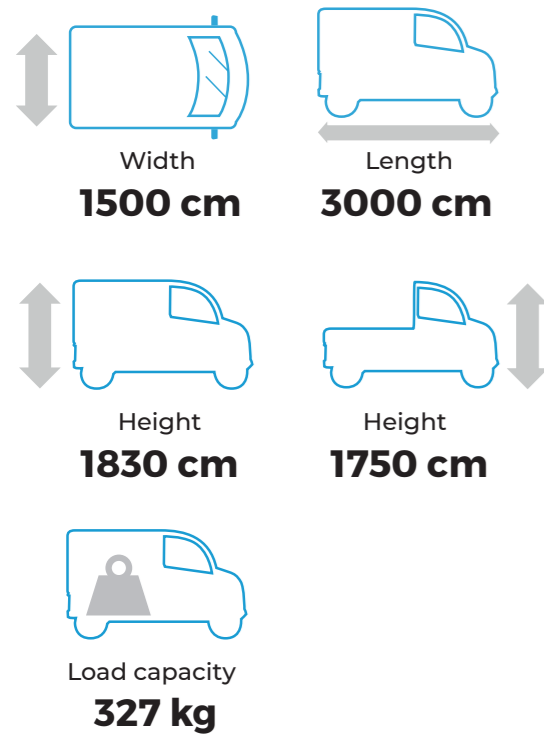

AIXAM ELECTRIC COMMERCIAL VEHICLE COMBINING UTILITY WITH GREEN TECHNOLOGY

- 0 sound pollution
- 0 CO₂ emissions
- Up to 100 km battery life under real-life conditions* and 130 km in a test cycle**
- 3:40 hours for a complete recharge using a 220 V domestic socket
- 1 hour to recharge 25 km of battery life
- Simplified, cost-effective maintenance

** Average battery life recorded with a typical journey. Several factors may have a negative impact on this value.
*** In accordance with EU regulations 134/2014 and 2016/1824

The e-TRUCK commercial licence-free cars range offers the longest loading bed on the market.

e STAKE BED TRUCK

2 m³
OF LOADING
CAPACITY

The detachable and foldable side rails allow for optimal ease of use and demonstrate the vehicle's exceptional modularity.

1.4 m
OF LOADING
LENGTH

For increased adaptability, the stake bed can be customised with a heightened frame with grilles.

- Rigid side rails, double walls, foldable and detachable
- Non-slip wooden bed
- Lockable rear door
- 620-litre under-bed storage

e VAN TRUCK

2.87 m³
OF LOADING
CAPACITY

The rear window of the cabin, combined with the rear glass doors of the van ensure excellent visibility when manoeuvring.

1.2 m
OF LOADING
LENGTH

- Fibreglass reinforced polyester white van doors and cell
- Lockable rear doors with vehicle key or remote control (option in the Electric pack)
- Non-slip wooden floor

- Cab grille
- Heightened frame with foldable grilles
- Rear door glass

FOR YOUR COMFORT

- Car radio
- Electric windows

FOR YOUR SAFETY

- Spare wheel
- Reversing alarm
- Reversing camera 5" screen
(On the van)

AIXAM SAFETY FIRST

At AIXAM, your safety is our priority. Our engineering teams operate under strict rules to create complex technical designs. By selecting high-tech parts and materials from large equipment manufacturers, we are committed to safety across the entire production chain.

AIXAM IS THE FIRST LICENCE-FREE CARS MANUFACTURER TO SUBJECT ITS RANGE TO CRASH TESTS.

While these are not required by law, since 1988 we have nonetheless gone above and beyond legal requirements by subjecting our models to crash tests.

*Depending on the model

01 SIDE ROOF RAIL SECTION

Its specific design is adapted to the vehicle's design, allowing it to directly attach the windscreen and the roof to the structure, thus increasing the car's rigidity and protecting the occupants.

02 STRENGTHENED DOORS

Bars protect occupants from side-on collisions.

03 SIDE RAILS

The lower body frames are strengthened to prevent deformation of the bodywork and to create a survival cell to protect the occupants.

04 LARGE WING MIRRORS

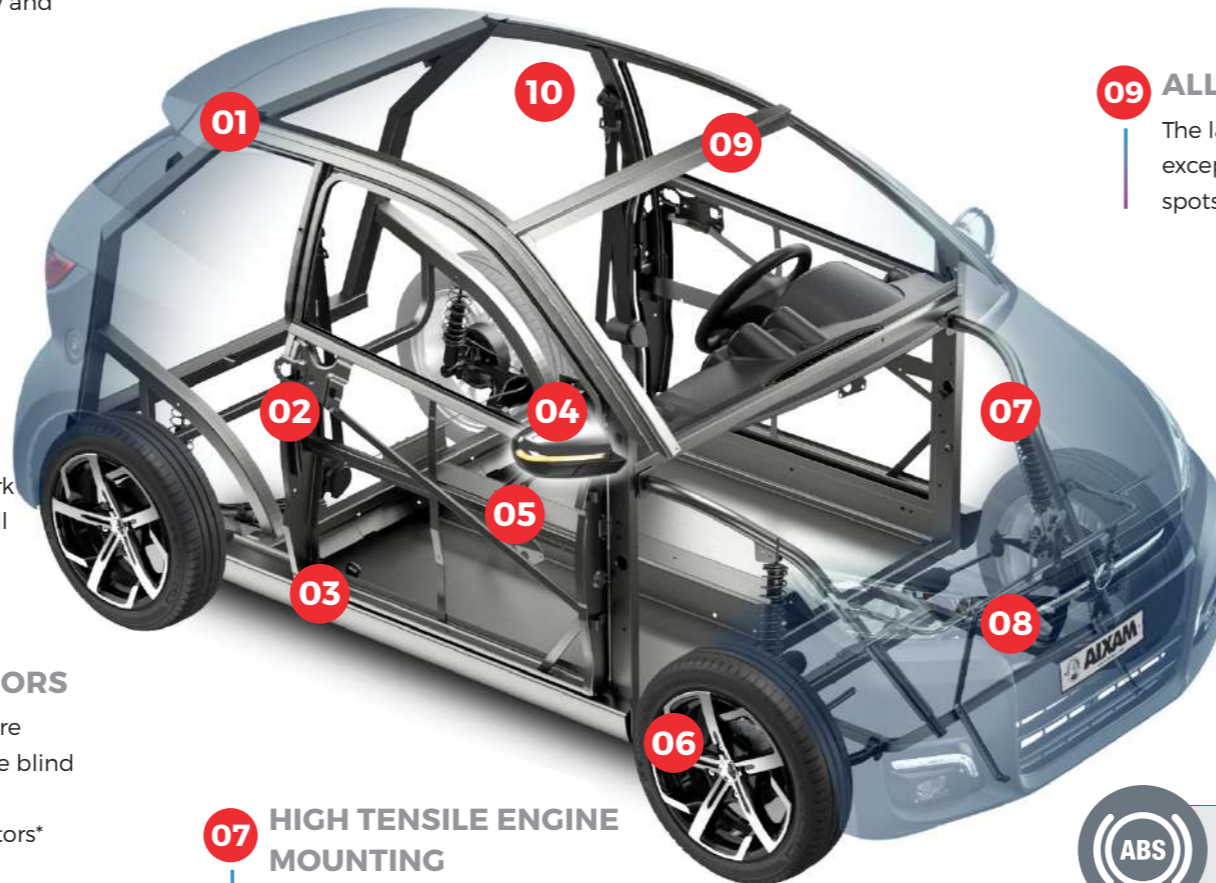

These large wing mirrors are rounded in order to reduce blind spots. The integrated LED indicators* make manoeuvring safer.

05 CENTRAL TUNNEL

Strengthens the frame and protects occupants.

06 X-SPLIT BRAKING SYSTEM

This system offers the best stability and safety on the market. The rigid brake pipe circuit requires less force to be applied to the brake pedal.

07 HIGH TENSILE ENGINE MOUNTING

The front mounting and the struts are made from High Tensile Steel, in order to obtain very high resistance to protect occupants while reducing mass.

08 BULK-DYED BODYWORK

This thermoformed bodywork cushions and absorbs the energy from light impacts.

09 ALL-AROUND VISIBILITY

The large windows offer exceptional vision, avoiding blind spots.

10 SEAT BELTS

The seat belts are tested when the vehicle is at full load, under a tractive force of 5.4 tonnes, i.e. double that required by legislation (2.7 tonnes). These tests use 36 times the average weight of each occupant.

AIXAM EXCLUSIVITY

And for maximum safety, AIXAM offers an ABS* braking option. In the event of an emergency stop, the ABS prevents the wheels from locking up.

The path is controlled, skidding is reduced, regarding of weather conditions.

A LOCAL NETWORK

AIXAM HAS THE BEST COVERAGE ACROSS FRANCE FOR LICENCE-FREE CARS (WHICH DO NOT REQUIRE A LICENCE IN FRANCE), THANKS TO ITS NETWORK OF CERTIFIED DISTRIBUTORS, AND OVER 220 SALES AND AFTER-SALES POINTS.

YOU WILL ALWAYS BE ABLE TO COUNT ON US DAY-TO-DAY, WHETHER IT'S ON THE ROAD OR AT HOME, FOR A SERVICE OR FOR ADVICE.

QUALITY SERVICES FOR YOUR PEACE OF MIND

CUSTOMER SERVICE AND MAINTENANCE

The certified AIXAM network has access to the most up-to-date information from the manufacturer regarding repairs and maintenance and offers highly organised customer service.

SUPPORT AND WARRANTY

AIXAM provides its vehicles with a 2-year parts and labour warranty and provides you with 2 years of breakdown assistance with unlimited mileage.

FINANCING

With the help of its partners, AIXAM offers you solutions to suit your budget.

SPARE PARTS

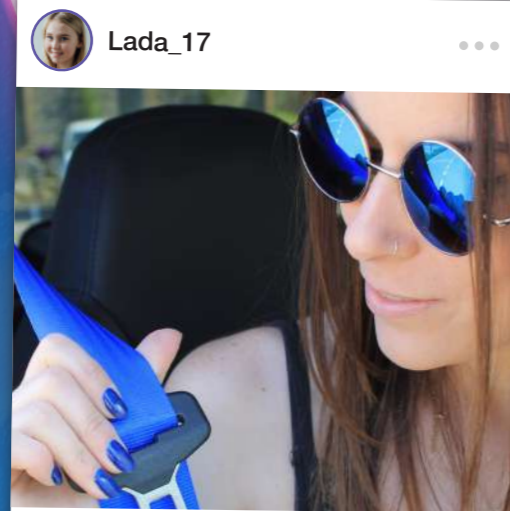

AIXAM is standardising spare parts and, thanks to its permanent stock, undertakes to supply its network and ensure that your AIXAM remains in good condition for a long time.

TAKING THE WHEEL, AT 14!

AIXAM is committed to mobility and providing independence for everyone. Even those who aren't yet old enough to take their driving test.

To help address the difficulties young people living in rural or suburban areas experience when it comes to mobility, AIXAM aims to provide more freedom for teenagers who are searching for independence.

Driving an AIXAM gives you the chance to explore and find your way while offering a safe and comfortable journey, in style!

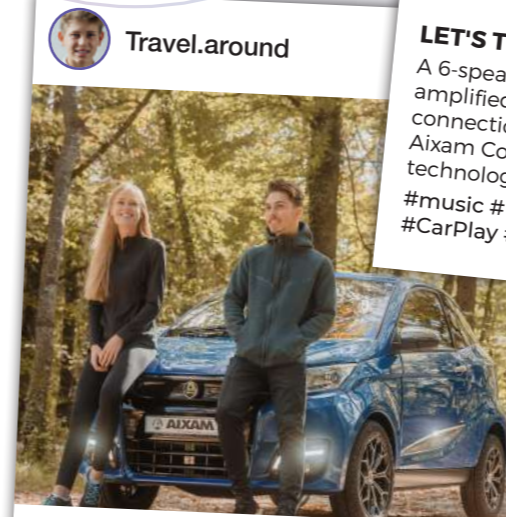

IT'S ALL UNDER CONTROL
Thanks to its equipment and its safety system, I can set off in my AIXAM with peace of mind. And with the ABS option, my path is controlled and skidding is reduced. I feel safe.
#safe #trust #abs #ReversingCamera #safety

LET'S GO, I'LL DRIVE YOU THERE
I have two seats next to each other, and a larger boot than in my mother's car! I can drive with whoever I like. I can take all our things in the boot and we can choose our own music. What more could you ask for?!
#together #Let'sGo #Spacious #things #music

WE ARE SENSIBLE
You don't need to be 18 to take the wheel. With a motorcyclist provisional licence [In France], I can drive myself before I sit my driving test. This way, it's much easier to learn at my own pace!
#confidence #MotorcyclistProvisionalLicence #DrivingLicence #future #independence

GO EXPLORING!
Now I can go where I want, when I want, with my AIXAM. I don't need to wait for my dad to be free, or to run to catch the last bus... It's changed my life!
#independence #freedom #ManagingMyTime #friends #ByeByeBus

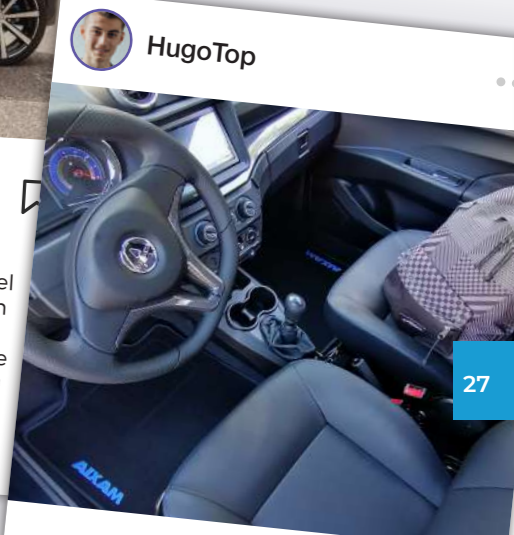

LET'S TURN UP THE VOLUME!
A 6-speaker audio system, Pioneer amplified subwoofer, Bluetooth connection, touchscreen tablet with Aixam Connect audio system... with all this technology, I am always connected.
#music #Bluetooth #Apple #Android #CarPlay #Music #Bluetooth

SAFE ON THE ROAD
I feel much safer with 4 wheels instead of 2! I'm more protected in traffic, no matter the weather. I can drive safely, day or night.
#protected #traffic #rain #snow #heat

STYLISH
My AIXAM is unique, just like me! Wheel rims, GT pack, multimedia touchscreen tablet, Audio system with 6 speakers... It's so well-equipped, with a wide range of options. The hardest part is choosing between them!
#MatteSteel #Choice #Style #NoLicence #Customised

SO COMFORTABLE
No need to walk back with the shopping any more! It's much better to drive in my AIXAM. Comfortable seats, lots of storage, a spacious interior... All I need to do is connect my phone to the tablet using Bluetooth. Easy!
#NeverWalkingAgain #comfort #GPS #AppleCarPlay #AndroidAuto

**FOR SHORT JOURNEYS, CONSIDER WALKING OR CYCLING
#TravelWhilePollutingLess**
